

## Letter of Recommendation

To: Whomever it Concern May Concern

It is with immense pleasure that I recommend Kunal Sunil Chavan for to your prestigious Internship program. I have had the distinct privilege of knowing Kunal for over a year now, both as his instructor for the IoT and IoT Domain Analyst courses at VIT Vellore, and as his research mentor on a Computer Vision project currently culminating in a co-authored publication. Kunal has impressed me with his drive and collaborative spirit. In my IoT courses, he consistently contributed insightful perspectives during class discussions and demonstrated a keen grasp of complex concepts. He was always willing to assist his peers, fostering a positive and productive learning environment. His dedication to research is truly exceptional.

When Kunal joined our Computer Vision project, he faced a significant hurdle: his prior exposure to the field was limited. Undeterred, he embarked on a self-directed learning journey, leveraging online resources like Coursera and Udemy to acquire the necessary knowledge and skills. Within a month, he had not only mastered the fundamental concepts but also began contributing meaningfully to the project, demonstrating remarkable initiative and a steep learning curve. His meticulous attention to detail has been invaluable in refining our research methodology and ensuring the accuracy of our findings.

Kunal's leadership abilities were also evident during his academic internship (GAIP) at NUS, where he effectively led a team of five students on a challenging project. He managed to balance individual contributions with team cohesion, ultimately delivering a successful outcome. His initiative in securing an internship at IIT further underscores his proactive approach to learning and professional development. While Kunal possesses a strong analytical mind, his enthusiasm sometimes leads him to delve into intricate details before fully considering the broader implications. However, he is receptive to feedback and has demonstrated a consistent ability to incorporate constructive criticism into his work, refining his approach to problem-solving with each new challenge.

The intellectual curiosity, collaborative nature, and unwavering dedication of Kunal will make him a valuable asset to your program. He possesses the raw talent, the drive, and the adaptability to excel in a rigorous academic environment, and I highly recommend him without reservation.

Prof. Dr. Sujatha R,  
Associate Professor Senior,  
Department of Embedded Technology,  
School of Electronics Engineering,  
Vellore Institute of Technology.
